EDUCATION

University of Maryland Baltimore County

Master of Professional Studies, Data Science

Baltimore, MD

Aug 2024 – May 2026

Dr. Babasaheb Ambedkar Technological University

Bachelor of Technology, Computer Science and Engineering

India

Aug 2018 – Aug 2022

PROFESSIONAL EXPERIENCE

Pioneer Wireless Software Pvt. Ltd.

Data Engineer

India

Jun 2022 – Jul 2024

- Monitored production data jobs and workflows on 1TB+ daily volume, investigating failures, performing re-runs, and escalating issues across 15+ integrated sources to maintain reliable data delivery
- Troubleshoot data issues reported by internal teams, as measured by a 28% reduction in data errors, by investigating root causes and implementing fixes across batch processing pipelines
- Improved query performance by 67% (45s to 15s) for 50+ concurrent users by maintaining and enhancing existing data pipelines, including operational improvements and new reporting outputs
- Supported data quality validation and QA testing for new and existing automations by validating outputs against source systems and business requirements, building a dbt-based transformation layer (60+ models)
- Built new data jobs supporting operational data delivery and client data needs, collaborating with engineering and business stakeholders to reduce manual reporting effort by 44%

Pigybak Inc.

Data Engineer Intern

Ohio, USA

Sep 2025 – Dec 2025

- Maintained and enhanced existing data pipelines on Azure Databricks, as measured by a 33% reduction in processing time (24h to 16h), through partition pruning and adaptive query execution
- Supported platform reliability across 60+ production tables by implementing automated data quality validation, reducing data incidents by 90%

Materna

Data Scientist Research Intern

Texas, USA

May 2025 – Aug 2025

- Built and validated a data pipeline using Python and BigQuery for ML evaluation workflows, cutting evaluation cycle time from 2 weeks to 3 days through troubleshooting and workflow enhancements

Young Progressives Initiative

Data Scientist Intern

Washington, DC

Jan 2026 – May 2026

- Built and maintained data infrastructure supporting program analytics for 500+ participants, validating outputs against source data and improving outcomes by 22%

Pioneer Wireless Software Pvt. Ltd.

Data Engineer Intern

India

Jan 2022 – Jun 2022

- Reduced data errors by 40% on 500K+ banking records by reading, troubleshooting, and modifying existing ETL workflows alongside senior team members

TECHNICAL SKILLS

Pipeline Reliability: Monitor production data jobs, investigate failures, perform re-runs, escalate issues, root cause troubleshooting

Data Quality & QA: Validating outputs against source systems and business requirements, QA testing, data validation frameworks

Programming: Proficient in SQL and Python for querying, transforming, and analyzing data

ETL & Data Pipelines: Data ingestion, transformation, validation, and movement between systems; ability to read, understand, troubleshoot, and modify existing code and data workflows

Azure Stack: Azure Data Lake, Azure Data Factory, Spark, Databricks, batch processing and streaming experience

Collaboration: Collaborate with Data Engineers, Analysts, and team leadership to support ongoing platform reliability

Certifications: Azure Data Engineer Associate (DP-203), Databricks Data Engineer Associate
